

Banking Staffing Update - September 2018

Roll Review Applications

If you believe you will have at least 5% more pupils enrolled on 1 March next year than the recent provisional roll states on your September staffing entitlement notice for 2019, click [here](#) to find out more about the application process, noting that applications close 26 October this year.

This link above is talking about your provisional **1 March** 2019 roll so many schools should simply multiply the total provisional roll by 1.05 to decide whether they meet the 5% threshold.

If your school has Year 1s however, your provisional roll is the MOEs estimate of your **10 October** 2019 roll, not the 1 March 2019 roll. (They have included a year 1 adjustment in the provisional total). Just subtract that "Y1 Adj" number from the total provisional roll to establish your 1 March total provisional roll before you multiply by 1.05 to find the 5% threshold.

NB:

Don't confuse this review process above with roll growth applications which can be done at any time during the year, usually up to about 4 December using a "Staffing Roll Change" form.
